TOPIC 1 · 10 MIN · CALENDAR

Lab 2: Calendar: Catch the Double-Booking Before You Say Yes

> Two meetings clash on Tuesday. Spark finds them and suggests a fix, and only you move anything.

Your goal

Use Spark to check a calendar, spot a clash and propose open slots without changing an event (LO1).

The story so far

Mei from Bukit Bakes wants a call next week, and your Tuesday is already double-booked. You need the clash found and three open slots to offer, with nothing moved until you say so.

You will deliver

- ☐ A brief naming the clash
- ☐ Three open slots for the Bukit Bakes call

Before you start

A personal Google Account on Google AI Pro or Ultra, age 18+, Keep Activity and Personal Intelligence on. A laptop with Chrome. Copy every prompt from labs/prompts.html, or from the course prompts page: https://tertiarycourses.github.io/TGS-2026064173-AI-Agents-with-Gemini-Spark/labs/prompts.html

Your mock data

File in data/	What it is
northstar-calendar.ics	A week of made-up meetings with one clash. Import into a new calendar.

Steps

Step 1. Import the mock calendar (3 min)

Where: Google Calendar

Create a new calendar named Northstar Lab, then import northstar-calendar.ics into it with Settings → Import & export.

Expect: Six recurring events appear in Northstar Lab only. Your own calendar is untouched.

Step 2. Find the clash and three open slots (7 min)

Where: Gemini → Task

Paste the prompt. Then ask Spark to move one meeting, read its confirmation request, and deny it.

PROMPT · COPY FROM THE LAB PROMPTS PAGE

```
Look only at my calendar named Northstar Lab for the next 7 days.
Name any clash. Then suggest three 20-minute open slots next week for a discovery call
with Bukit Bakes, between 9 AM and 5 PM Singapore time.
Do not create, move or cancel any event. Ask me first.
```

Expect: The Tuesday 10 AM clash between Bukit Bakes and Lumen Yoga, and three free slots.

You decide: Pick the slot. The calendar is yours.

Checkpoint

Spark named the Tuesday clash, and no event changed without your confirmation.

If you finish early, or after class

• Ask Spark to draft the Gmail reply to Mei offering your chosen slot, saved as a draft.

If Spark does not behave as described

Menus move and results vary, so this lab states what to expect and not exact wording. Check the source in Google Help, tell your trainer, and record what you actually saw. No Pro or Ultra account in class? Pair with a neighbour and complete the Docs, Sheets and Sites templates by hand.

All company data in this lab (Northstar Studio, people, enquiries, reviews, numbers) is fictional and generated for training.
