Lab 3: Docs: Write the Contract Your Agent Works Under

> Pick two platforms and draw the line in writing. Spark fills the template. Every decision stays yours.

Your goal

Recommend two media platforms and set what Spark, the site builder and the owner may each do (LO1).

The story so far

You have seen what Spark can do. Now put the boundary in writing before it touches anything public: which two platforms carry the launch, who may do what, and when Spark must stop.

You will deliver

☐ Northstar-Agent-Task-Contract in Google Docs: two platforms, permission matrix, approval map, stop rules

Before you start

A personal Google Account on Google AI Pro or Ultra, age 18+, Keep Activity and Personal Intelligence on. A laptop with Chrome. Copy every prompt from labs/prompts.html, or from the course prompts page: https://tertiarycourses.github.io/TGS-2026064173-AI-Agents-with-Gemini-Spark/labs/prompts.html

Your mock data

File in data/	What it is
northstar-content-inventory.csv	Approved and prohibited claims. Spark may only use these.
agent-task-contract-template.docx	The contract Spark fills in: platforms, matrix, approvals, stop rules.
platform-notes.docx	Audience and channel notes for choosing two platforms.

Steps

Step 1. Have Spark fill the contract (8 min)

Where: Gemini → Task, then Google Docs

Attach agent-task-contract-template.docx and platform-notes.docx, then paste the prompt.

PROMPT · COPY FROM THE LAB PROMPTS PAGE

```
Create a Google Doc named Northstar-Agent-Task-Contract in my Gemini Spark
Workspace/Northstar folder, following the attached template exactly.
Recommend two media platforms for the website rollout using the attached platform notes.
For each, state the audience, the action it drives, the owner, the risk and a KPI.
Fill the permission matrix for Gemini Spark, the site builder and the human owner. Every
send, publish or pay action stays with the human owner.
```

Expect: A Doc with two justified platforms, a full matrix, an approval map and stop rules.

You decide: The permission matrix must be yours, not Spark's.

Step 2. Correct it and take your evidence (7 min)

Where: Google Docs

Read every row. Change at least one line you disagree with. Then take the screenshot showing the platforms and the matrix.

Expect: A contract you would hand to a new staff member.

You decide: Sign it off. This is your PP Task 1 evidence.

Checkpoint

Two platforms are justified, and every send, publish or pay row sits with the human owner.

Assessment evidence

PP Task 1: ONE screenshot of your completed agent task contract showing the two platforms and the permission matrix.

If you finish early, or after class

• Ask Spark to create a private Google Keep note listing your three stop rules.

If Spark does not behave as described

Menus move and results vary, so this lab states what to expect and not exact wording. Check the source in Google Help, tell your trainer, and record what you actually saw. No Pro or Ultra account in class? Pair with a neighbour and complete the Docs, Sheets and Sites templates by hand.

All company data in this lab (Northstar Studio, people, enquiries, reviews, numbers) is fictional and generated for training.
