TOPIC 4 · 7 MIN · SHEETS

Lab 14: Scorecard: Do the Maths on Whether Spark Earns Its Keep

> Minutes saved minus minutes reviewing. If the answer is negative, change it or stop it.

Your goal

Score the workflow on quality, safety, efficiency and outcome, and make a keep, change or stop decision (LO4).

The story so far

A finished run proves nothing. You have run Spark all day, so now judge it with evidence you can open and show.

You will deliver

☐ Northstar-Scorecard in Sheets with four KPIs and net minutes saved

Before you start

A personal Google Account on Google AI Pro or Ultra, age 18+, Keep Activity and Personal Intelligence on. A laptop with Chrome. Copy every prompt from labs/prompts.html, or from the course prompts page: https://tertiarycourses.github.io/TGS-2026064173-AI-Agents-with-Gemini-Spark/labs/prompts.html

Your mock data

File in data/	What it is
scorecard-template.xlsx	Four KPI rows with evidence, plus a net-minutes calculation.

Steps

Step 1. Build the scorecard and decide (7 min)

Where: Gemini → Task, then Google Sheets

Attach the template and paste the prompt with your own minutes. Check the formula. Write one line: keep it, change it or stop it.

PROMPT · COPY FROM THE LAB PROMPTS PAGE

```
Create a Google Sheet named Northstar-Scorecard in my Gemini Spark Workspace/Northstar
folder from the attached template, filling in today's evidence for quality, safety,
efficiency and business outcome.
My minutes: doing this by hand [X], reviewing Spark [Y], fixing Spark's errors [Z].
Calculate the net minutes saved with a formula.
```

Expect: Four KPIs, each with an evidence source, and a live net-minutes figure.

You decide: Keep it, change it or stop it? Write one line and sign it.

Checkpoint

Four KPIs each have an evidence source, and the net-minutes figure is a live formula.

If you finish early, or after class

• Change one more instruction, re-run, and add a second column. One change at a time, so you know which change did it.

If Spark does not behave as described

Menus move and results vary, so this lab states what to expect and not exact wording. Check the source in Google Help, tell your trainer, and record what you actually saw. No Pro or Ultra account in class? Pair with a neighbour

and complete the Docs, Sheets and Sites templates by hand.

All company data in this lab (Northstar Studio, people, enquiries, reviews, numbers) is fictional and generated for training.
